CISSP Course Overview

The course will provide comprehensive coverage in all 10 areas of knowledge as defined by the (ISC)2: Access Control, Application Security, Business Continuity and Disaster Recovery Planning, Cryptography, Information Security and Risk Management, Legal, Regulations, Compliance and Investigations, Operations Security, Physical (Environmental) Security, Security Architecture and Design, Telecommunications and Network Security.

In our training program, all salient points and important areas relevant to the CISSP test will be given to you in a condensed format, and you will be prepared with simulation tests that closely resemble the real one. The course materials will be delivered by an instructor with 14 years of relevant IT experiences in 12 sessions. The first 10 sessions will concentrate on the 10 domains of knowledge, and the last 2 sessions will focus on test preparation and test taking techniques and simulation test drills.
